## Would you recommend IEP to your peers?

Yes I would, it was a lot better than expected. I joined a university programme costs \$700 but it was EXTREMELY BORING. But for the ICE programme, it was a lot more interesting and rewarding. Thank you so much for making my summer holidays a rewarding one!!!

I did have a lot of rare experiences that I definitely wouldn't have if I hadn't been here!

**Sacred Heart Canossian College**

Absolutely, meaningful, would want to join with my friends

**The Chinese Foundation Secondary School**

Really a worth-joining programme with high-quality content. The guys are nice, the lessons are funny, the concepts are memorable. Add oil and keep it on!!!

**Kwun Tong Maryknoll College**

I felt like this is one of my best decision to join the programme. Here I met people from different places (like seriously I have never imagined talking to people in Belarus, Poland, and much more). I certainly learned and care more about issues such as human rights, human trafficking, etc.

Of course, at the same time this programme is FUN. All of you are so nice and optimistic and interesting. Listening to opinions from you inspired me and made me smile a lot.

Lastly the talk with global leaders (my fav part)! Everything I heard was inspiring and now I really see the world in a very different way. Not to mention I see much more happiness and hopes and wonderful things that happened just around us! Let's all get out of our comfort zone, work hard, and be optimistic at the same time!

**St. Paul's Co-educational College**

[www.icehongkong.com](http://www.icehongkong.com)

DEFINITELY, because they will feel richer. I have gained so many skills and insights that no words can express how much I have learnt in the programme.

I had misconceptions or misunderstanding in the past that I didn't even notice in the first place, not until I joined IEP. We even got the chance to talk to global leaders and citizens from all around the world, an opportunity that I would never get from other program. So yes, yes, yes. Definitely recommend!

**Belilios Public School**

Definitely yes! IEP really helps me to broaden my horizon. I had no idea about such culture and global issues. In the last three days, not only did I do research on some topics, but there are also many guests across the world sharing with us. Those are really great experiences as I surely do not have that many foreign friends. At the same time, you can speak more in English and meet so many great people. So many memorable sessions and I really like it haha.

**St. Mark's School**

## Messages to ICE Team and other guests

A big fat THANK YOU! 3 days in front of a screen did not feel like interaction through a screen. I did not feel a digital barrier...if that makes sense. It felt incredibly lively and as if we were all in the same venue, though in reality we were scattered across Hong Kong and the world.

**Ying Wa Girls' School**

One of the guest of global leaders made me cried today because of how simple and precise his answer was towards my question and it hit me real hard – taking care of yourself is not selfish. During school suspension in COVID, I started to bring more self-awareness and self-love into my life. Because sometimes I got lost drowning in the hustles under the education system and I could not see the REAL me. But by bringing more awareness, care and reflections to my daily routine, I gradually know myself better and it helps shape into who I am now.

I am literally balling my eyes while writing this, it affects me a lot like A LOT!! Thank you very much for the whole ICE team, for accepting me, for bringing me this all the valuable experiences. Words can no longer express how grateful I'm to be a part of this programme. Thank you for doing. I hope that I can do something in return and wish to see everyone of you in person someday!!

**St. Mark's School**
